- Romanian - A2

Profile

Frontend developer with a great understanding of bringing **business value**.
Combining the best of two words, I chose to focus on software **development** while still keeping in mind that our **users** are the ones driving the **needs** and setting the directions.
Running helps me to clear my head and prepare for the challenges of the day.

Work experience

Frontend developer • HowToRobot
Full time
2024 - Present

Lead frontend developer working on **Drupal** based online platform that connects robot suppliers with buyers all over the world.

Optimising the code to follow **best practices** and **ES-lint** standards to better support the growing needs of the platform.

Frontend developer • A.P. Moller - Maersk
Fulltime
2023 - 2024

Working simultaneously on two company's top 10 applications. Mainly focused on creating new functionality using **typescript** as well as **trouble shooting**.

Student assistant • A.P. Moller - Maersk
Part time
2022 - 2023

Responsible for many admin tasks as well as getting first hand on experience on **software development**.

Education

Digital Business • Copenhagen Business School
Master's degree
2021 - 2023

My master thesis focused on implementing **machine learning** techniques to measure the impact of ESG Scores on **financial efficiency** on selected industries.
